# Press release

Hilzingen/Pforzheim, Germany – April 2024

## **Renfert and Forestadent: Powerful partnership for digital orthodontics**

Renfert, a renowned manufacturer of devices and solutions for dentistry and dental technology with almost a century of experience, announces its collaboration with Forestadent. Forestadent (Pforzheim), a company with a 100-year tradition and more than four decades of orthodontic expertise, is committed to advancing digitalization in orthodontics. The partnership with Renfert sets a milestone for the future.

The partnership focuses on the SIMPLEX 3D filament printer system (Renfert), a customized solution for the efficient 3D printing of orthodontic models. SIMPLEX marks a new era in digital orthodontics. The dental-specific complete solution comprises everything you need for printing orthodontic models: a modern 3D printer, intuitive modelling software, dental slicer software and various special filaments. Renfert is a renowned manufacturer of high-quality products made in Germany. For dental offices, this quality ensures high standards in terms of processing and functionality. Forestadent complements this expertise with extensive orthodontic experience, in-depth professional knowledge and a broad network.

The SIMPLEX 3D filament printer system offers significant added value for dental offices. It is the easy entry into the digital world of orthodontics with low investment, printing and material costs. In addition, SIMPLEX ensures safe, environmentally friendly production of orthodontic models. The space-saving design enables the system to be seamlessly integrated into everyday practice. Comprehensive service and support complement the system. In this way, the partnership between Renfert and Forestadent is setting new standards in digital orthodontics. Dental offices are cordially invited to be part of this exciting development. Find more information at: [renfert.com/simplex](https://renfert.com/simplex)
